EXPERIENCE

Contract Basis

Oct 2021 - Present

- Worked on various project remotely. Used understand of react.js and javascript fundamentals to promote and leverage the project that I have been worked on.
- Communicated with other teams and senior management to write code for websites to adapt to changing industry standards.
- Introduced wider use of Reactjs and JavaScript for web applications, decreasing load times by roughly 35%, which is itself a great work *acknowledge by clients.*

PROJECTS

Leave Request UI for a Company

[Link](#)

Created UI of a website for a US based corporation, which let their employees request leave for particular reason after sending the request admin have options in it to approve the leave or decline it.

Used reactjs, hooks webpack, SCSS, 100% responsive across all devices.

Event Website using react.js

[Link](#)

Created UI of Web App using react.js. Which let their users to post upcoming events and join or book the events.

I only handled front end part of this website. Can be accessed by above link.

New York Times Wordle Clone

[Link](#)

Cloned New York Times Wordle game.

Used Vanilla JavaScript and pure CSS.

used official wordle dictionary for checking the words in it.
